# PARTNERSHIP WITH THE VOLVO GROUP

Two leading players in the commercial vehicle business joined hands in 2008 with a convergent vision of driving modernization in commercial transportation. Volvo Group, the world's leading manufacturer of trucks, buses, construction equipment and marine and industrial engines, has infused its global expertise and world-class technology with Eicher Motors' innovative engineering and proven DNA of fuel efficiency.

VECV includes the complete range of Eicher commercial vehicles, components and engineering design businesses as well as the sales and distribution of Volvo trucks in India.

Each of its business units is well-established and backed by a sizable customer base.

- Best-in-class fuel efficiency
- Frugal engineering & operations
- Indian leader in medium-duty trucks
- Strong aftersales support

- Environment & safety conscious
- World-class technology
- Global leaders in heavy-duty trucks
- Customer-driven solutions

# EICHER'S EURO-V STORY

Eicher is creating a new benchmark in the commercial vehicle industry with a revolutionary Euro V solution that combines global technology with innovative support services. This solution doesn't just make your vehicle Euro V compliant but ensures higher productivity of the truck and profitability of your business.

## **Euro V expertise**

VECV has been manufacturing & supplying Euro V engines to Volvo Group since 2018. The engine has been tested for more than 10,00,000 Kms

## **Superior Uptime**

With the new Euro V technology, superior uptime means that not only the passengers reach their destination on time, but the buses are raring to go for their next trips, and profits are being made on each trip.

## **Efficient EATS and Engine Technology**

With the improved Euro V technology, our EATS system will now treat and control pollutants like NOx, CO, HC and PM more efficiently, through different chemical processes.

## **Superior Reliability and Durability**

With the Euro V technology, our buses are equipped with superior reliability with stronger and improved aggregates.
